Notes and Issues:	1. There can be an error when connecting to the database		

Use Case ID:	13		
Use Case Name:	Create company profile		
Created By:	Ramla	Last Updated By:	Ramla
Date Created:	28 th February, 2013	Date Last Updated:	7 th March, 2013
Actors:	Employer		
Description:	A form would be available to user to fill company information. As a result, the company's profile will be created.		
Trigger:	Log in as employer and click on the button to create company profile.		
Preconditions:	1. User's identity has been authenticated as an employer.		
Postconditions:	1. The company's profile is made available to users of the portal. 2. The profile is also made available to its creator (employer) for editing and updating if requested (which is another use case).		
Normal Flow:	13.0 Employer selects the "Create Company Profile" option. 13.1 System displays the form to be filled to create profile. 13.2 Employer fills the required fields and submits the form. 13.3 System displays the profile to employer and makes it visible to other users of the job portal.		
Alternative Flows:	13.1 Employer presses the Cancel button and returns to home page. 13.2 Employer can select the Reset option to omit information filled in any of the fields since logged in.		
Exceptions:	13.0.E.0 Server may be down. The system informs the employer about the problem and recommends trying again later. 13.0.E.2 The system may not save company information and display the profile. The change is rolled back and a message is prompted to the employer to enter information again.		
Includes:	None		
Priority:	High		
Frequency of Use:	Once at the time of making a new account/profile		
Business Rules:	None		
Special Requirements:	1. Confirmation message about successful creation of profile will be sent to the employer within 10 seconds of submission. 2. 24/7 availability of create company profile option to the employer. 3. Employer logged in from one account should only be allowed to create one company profile. 4. The profile is not available to people who are not users of Angry Bosses: the job portal.		
Assumptions:	None		
Notes and Issues:	1. Unsuccessful creation of profile because of usage of portal in peak work hours or other reasons. This issue will only be resolved by the user's retry.		

Use Case ID:	14		
Use Case Name:	Add new job opening		
Created By:	Ramla	Last Updated By:	Ramla
Date Created:	28 th February, 2013	Date Last Updated:	7 th March, 2013
Actors:	Employer		
Description:	The system will prompt the user to fill information about a new job opening in a form and submit it. The job opening will be displayed to the employer as well as made visible to other users on the portal.		
Trigger:	Sign in as employer and select the option for posting a new job opening.		
Preconditions:	1. User's identity has been authenticated as an employer. 2. The user has created a company profile already.		
Postconditions:	1. A message for successful addition of job opening is sent to employer. 2. New job opening is posted and is visible to all users of the portal.		
Normal Flow:	14.0 Employer selects the Post new job opening option. 14.1 The system displays a form containing fields about job opening's information. 14.2 Employer fills the required fields and submits it. 14.3 System generates a confirmation message, adds the job opening to the database and makes it available to all users of the job portal.		
Alternative Flows:	14.1 Employer presses the Cancel button and returns to home page. 14.2 Employer can select the Reset option to omit information filled in any of the fields and type again.		
Exceptions:	14.0.E.0 Server may be down. The system informs the employer about the problem and recommends trying again later. 14.0.E.2 The system may not save the job opening and display it. The change is rolled back and a message is prompted to the employer to enter information again.		
Includes:	None		
Priority:	High		
Frequency of Use:	Approx. 200 users. Number of openings varies for each company.		
Business Rules:	None		
Special Requirements:	1. Confirmation message about successful addition of job opening will be sent to the employer within 10 seconds of submission. 2. 24/7 availability of post job opening option to the employer. 3. The job opening is not available to people who are not users of Angry Bosses: the job portal.		
Assumptions:	None		
Notes and Issues:	1. Unsuccessful addition of job opening because of usage of portal in peak work hours or other reasons. This issue will only be resolved by the user's retry.		

Use Case ID:	15		
Use Case Name:	Search for potential employees.		
Created By:	Ramla	Last Updated By:	Ramla
Date Created:	28 th February, 2013	Date Last Updated:	7 th March 2013
